## **Mylan Advances Access in the Fight Against HIV with the Launch of Three Generic Antiretroviral Medicines in Canada**

*Mylan now offers generic alternatives to Truvada<sup>®</sup>, Atripla<sup>®</sup> and Viread<sup>®</sup> to patients in Canada<sup>1</sup>*

HERTFORDSHIRE, England and PITTSBURGH and TORONTO, Aug. 10, 2017 /PRNewswire/ -- Mylan Pharmaceuticals ULC, a subsidiary of Mylan N.V. (NASDAQ, TASE: MYL), a leading global pharmaceutical company, today announced the launch in Canada of three generic products indicated in the treatment of HIV for certain patients. One of the products is Mylan-Emtricitabine/Tenofovir Disoproxil Fumarate 200 mg/300 mg, a generic alternative to Truvada<sup>®</sup>.

Mylan received final approval from Health Canada for this product and for Mylan-Efavirenz/Emtricitabine/Tenofovir Disoproxil Fumarate 600 mg, 200 mg, and 300 mg, a generic alternative to Atripla<sup>®</sup>; and Mylan-Tenofovir Disoproxil 300 mg, a generic alternative to Viread<sup>®</sup>.

Mylan's Chief Commercial Officer Tony Mauro said, "Mylan has a strong and sustained commitment to expanding access to treatment for HIV/AIDS and other diseases around the world, and today marks another milestone in those efforts. More than 40% of people worldwide being treated for HIV/AIDS with an antiretroviral depend on a Mylan product every day, and we're proud to further expand access to such medicines in Canada."

Approximately 37 million people globally are living with HIV/AIDS today. As a champion for access, Mylan has invested \$250 million in expanding its antiretroviral (ARV) production capacity, enabling the company to produce 4 billion ARV tablets and capsules every year.

Mylan-Emtricitabine/Tenofovir Disoproxil Fumarate 200 mg/300 mg is indicated in combination with other antiretroviral agents for the treatment of HIV-1 infection in adults.

Mylan-Efavirenz/Emtricitabine/Tenofovir Disoproxil Fumarate 600 mg, 200 mg, and 300 mg is indicated for use alone as a complete regimen or in combination with other antiretroviral agents for the treatment of HIV-1 infection in adults.

Mylan-Tenofovir Disoproxil 300 mg is indicated for the treatment of HIV-1 infection in combination with other antiretroviral agents in patients 12 years of age and older and the treatment of chronic hepatitis B infection in adults.

Mylan is a global pharmaceutical company committed to setting new standards in healthcare. Working together around the world to provide 7 billion people access to high quality medicine, we innovate to satisfy unmet needs; make reliability and service excellence a habit; do what's right, not what's easy; and impact the future through passionate global leadership. We offer a growing portfolio of more than 7,500 marketed products around the world, including antiretroviral therapies on which approximately 50% of people being treated for HIV/AIDS in the developing world depend. We market our products in more

than 165 countries and territories. We are one of the world's largest producers of active pharmaceutical ingredients. Every member of our more than 35,000-strong workforce is dedicated to creating better health for a better world, one person at a time. Learn more at [Mylan.com](http://Mylan.com) or Mylan.ca.
