Supreme Court Chief Justice Denies Teva's Request for an Injunction Relating to Generic Copaxone®; Clears Legal Hurdle for Mylan to Launch at Market Formation

PITTSBURGH, April 18, 2014 /PRNewswire/ -- Mylan Inc. (Nasdaq: MYL) today announced that Supreme Court Chief Justice Roberts has denied Teva's application for an injunction seeking to prevent Mylan's launch of a generic version of Copaxone® pending the Supreme Court's decision on Teva's appeal. This is the second time that the Chief Justice has denied Teva's request for such an injunction.

In March, the Supreme Court granted Teva's petition for certiorari seeking clarification of the standard of review that appellate courts should apply when considering appeals relating to the construction of a patent claim. Oral argument is expected to be heard in the fall of 2014.

Mylan CEO Heather Bresch commented: "We are pleased with the Chief Justice's decision, and we look forward to introducing the first generic Copaxone® treatment for multiple sclerosis patients in the U.S. at market formation. Mylan remains eligible to receive approval from the U.S. Food and Drug Administration on May 25, 2014."

This press release includes statements that constitute "forward-looking statements," including with regard to litigation and sales of products. These statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Because such statements inherently involve risks and uncertainties, actual future results may differ materially from those expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to: any legal or regulatory challenges to the settlement; strategies by competitors or other third parties to delay or prevent product introductions; risks inherent in legal and regulatory processes; and the other risks detailed in the company's filings with the Securities and Exchange Commission. The company undertakes no obligation to update these statements for revisions or changes after the date of this release.

Mylan is a global pharmaceutical company committed to setting new standards in health care. Working together around the world to provide 7 billion people access to high quality medicine, we innovate to satisfy unmet needs; make reliability and service excellence a habit; do what's right, not what's easy; and impact the future through passionate global leadership. We offer a growing portfolio of more than 1,300 generic pharmaceuticals and several brand medications. In addition, we offer a wide range of antiretroviral therapies, upon which approximately 40% of HIV/AIDS patients in developing countries depend. We also operate one of the largest active pharmaceutical ingredient manufacturers and currently market products in approximately 140 countries and territories. Our workforce of more than 20,000 people is dedicated to improving the customer experience and increasing pharmaceutical access to consumers around the world. But don't take our word for it. See for yourself. See inside. mylan.com
