# Non-GAAP Financial Measures

This presentation includes the presentation and discussion of certain financial information that differs from what is reported under U.S. GAAP. These non-GAAP financial measures, including, but not limited to, adjusted gross margins, adjusted R&D as % of total revenues, adjusted SG&A as % of total revenues, adjusted net earnings, adjusted EPS, adjusted net cash provided by operating activities, adjusted free cash flow and adjusted segment profitability for North America are presented in order to supplement investors' and other readers' understanding and assessment of the financial performance of Mylan N.V. ("Mylan" or the "Company"). In the Appendix, Mylan has provided reconciliations of such non-GAAP financial measures to the most directly comparable U.S. GAAP financial measures. Investors and other readers are encouraged to review the related U.S. GAAP financial measures and the reconciliations of the non-GAAP measures to their most directly comparable U.S. GAAP measures set forth below, and investors and other readers should consider non-GAAP measures only as supplements to, not as substitutes for or as superior measures to, the measures of financial performance prepared in accordance with U.S. GAAP.

## 2019 Guidance

Mylan is not providing forward looking guidance for U.S. GAAP reported financial measures or a quantitative reconciliation of forward-looking non-GAAP financial measures to the most directly comparable U.S. GAAP measure because it is unable to predict with reasonable certainty the ultimate outcome of certain significant items without unreasonable effort. These items include, but are not limited to, acquisition-related expenses, restructuring expenses, asset impairments, litigation settlements and other contingencies, including changes to contingent consideration and certain other gains or losses. These items are uncertain, depend on various factors, and could have a material impact on U.S. GAAP reported results for the guidance period.

Weighted average diluted ordinary shares outstanding	<u>516.7</u>		<u>516.8</u>	

(a) The increase in purchase accounting related amortization is primarily due to amortization expense related to certain product rights acquisitions which occurred in 2018.

(b) Acquisition related costs consist primarily of integration activities.

(c) For the three months ended March 31, 2019, approximately \$14.5 million is included in cost of sales, approximately \$0.1 million is included in R&D, and approximately \$5.3 million is included in SG&A. Refer to Note 17 Restructuring included in Part I, Item 1 of the Form 10-Q for additional information.

(d) Beginning in 2019, share-based compensation expense is excluded from adjusted net earnings and adjusted EPS. The full year impact for the year ended December 31, 2018 was insignificant. As such, the 2018 quarterly amount was not added back to U.S. GAAP net earnings for the quarter ended March 31, 2018.

(e) The three months ended March 31, 2019 increases relate primarily to expenses of \$58.8 million for certain incremental manufacturing variances and site remediation activities as a result of the activities at the Company's Morgantown plant.

(f) For the three months ended March 31, 2019, R&D expense includes \$23.3 million related to non-refundable upfront licensing amounts for products in development with the remaining expense relating on-going development collaborations. Refer to Note 4 Acquisitions and Other Transactions included in Part I, Item 1 of the Form 10-Q for additional information. R&D expense for the three months ended March 31, 2018 includes two non-refundable upfront payments totaling approximately \$43.0 million for development agreements entered into during the quarter.

(g) The 2018 amount primarily related to mark-to-market losses of investments in equity securities historically accounted for as available-for-sale securities and the cumulative realized gains on such investments.

This target does not reflect Company guidance.
