Mylan Donates €1 Million to the Princess Máxima Center for Pediatric Oncology

HERTFORDSHIRE, England, PITTSBURGH, and UTRECHT, Netherlands, June 23, 2016 /PRNewswire/ -- Mylan N.V. (NASDAQ, TASE: MYL), one of the world's leading pharmaceutical companies, today announced a €1 million donation to the Princess Máxima Center for Pediatric Oncology, a new national cancer center currently being built in Utrecht, the Netherlands.

The donation from Mylan will support the Princess Máxima Center in its mission of treating and curing children with cancer by enhancing research efforts and supporting patients and their families while at the center for treatment.

Mylan Executive Chairman Robert J. Coury commented, "Mylan's mission is to set new standards in healthcare and provide access to high quality medicine to patients around the world; however, our mission starts with the communities in which we operate, and we have had the privilege to serve customers and patients in the Netherlands for more than 17 years. The mission of the Princess Máxima Center is closely aligned with Mylan's and I would like to commend Prof. Pieters for his vision and leadership in raising the standard of care for cancer in the Netherlands and ensuring children with cancer have equal access to the best care available."

Mylan CEO Heather Bresch added, "Every two days a child dies from cancer in the Netherlands and one in four children does not survive their fight with this disease. Through our commitment to providing access to oncology medications to patients around the world, we strive to do our part to help treat and cure cancer, and we believe our partnership with The Princess Máxima Center is just one of the ways we can go beyond medicine to deliver better health for a better world."

Professor Pieters, member of the board of the Princess Máxima Center commented, "We are grateful to Mylan for their generous support of the Princess Máxima Center, which is focused on treating children with cancer using the best possible methods, while also preventing the development of negative side effects in young patients, both now and over the long term. By bringing together expertise in care and research in the Princess Máxima Center, the Netherlands will become a leader in the field of pediatric oncology both in Europe and globally. It is a position that will help us fulfill our ambition: to cure every child with cancer. I am delighted that our collaboration with Mylan will further support the care we provide and our continued research."

Matean Niël, Mylan country manager in the Netherlands added: "I am thrilled to see Mylan supporting a cause in the Netherlands that puts people and patients first. Mylan's support of the Princess Máxima Center creates a lot of pride among our hundreds of employees based in Bunschoten, Weesp and Zwolle. This initiative reflects our local commitment to institutional care in the Netherlands."

About Mylan

Mylan is a global pharmaceutical company committed to setting new standards in healthcare. Working together around the

world to provide 7 billion people access to high quality medicine, we innovate to satisfy unmet needs; make reliability and service excellence a habit; do what's right, not what's easy; and impact the future through passionate global leadership. We offer a growing portfolio of more than 1,400 generic and branded pharmaceuticals, including antiretroviral therapies on which nearly 50% of people being treated for HIV/AIDS in the developing world depend. We market our products in approximately 165 countries and territories. Our global R&D and manufacturing platform includes more than 50 facilities, and we are one of the world's largest producers of active pharmaceutical ingredients. Every member of our more than 35,000-strong workforce is dedicated to creating better health for a better world, one person at a time. Learn more at mylan.com

About The Princess Máxima Center

The Princess Máxima Center brings highly complex care and research in Pediatric Oncology in the Netherlands together. This integration of care and research is unique and will lead to cure more children with cancer. It also aims to become the European leading center for Pediatric Oncology.

The Princess Máxima Center will be located in a brand new building in Utrecht. This will be opened in 2018. Learn more at www.prinsesmaximacentrum.com.
